ABOUT

Gabriel Ferreira Fritz is an developer who has been working with PHP, HTML, CSS, Laravel, and Slim Framework stacks for the past 5 years.

Throughout his career, Gabriel has been involved in a wide range of projects, from small-scale websites to large-scale web applications. He is well-versed in both front-end and back-end development, and is able to seamlessly integrate the two.

Gabriel's expertise with PHP allows him to create dynamic and interactive websites and applications. He is also skilled in HTML and CSS, which enables him to design visually appealing and user-friendly interfaces.

In addition to his technical skills, Gabriel is a team player who is able to work effectively in collaborative environments.

Overall, Gabriel Ferreira Fritz is a highly skilled and experienced developer who would be a valuable asset to any development team.

EDUCATION

AUGUST, 2017
TÉCNICO EM INFORMÁTICA, QI FACULDADE E ESCOLA TÉCNICA

The Course was a turning point in my life, it was what made me decide that the development area was the one I wanted to pursue. gave me a range of technical and theoretical knowledge. The kickoff of my career.

APRIL, 2019
ANÁLISE E DESENVOLVIMENTO DE SISTEMAS, UNISINOS

I started graduation, but due to the pandemic I couldn't continue. Post pandemic I decided not to go back because it wasn't the course I was looking for. My focus is to start Software Engineering college

PROJECTS

ALERTACAR, LP, API AND SPA

A vehicular consultation service, via whatsapp or online chat the customer sends the license plate and the type of consultation he wants to carry out. Landing page developed in PHP, HTML/CSS and Boostrap, rest API developed in Laravel making communications both with the query service provider's database and with the whatsapp control service. My role in this project was the development of new features and maintenance of systems linked to the project.

PEFIN CREDENCIE, WEB SYSTEM

Panel of negatives where companies carry out the negatives of their debtor clients. Developed with the Slim Framework using the stacks, PHP, HTML/CSS, Javascript and the bootstrap framework, it runs communicated with a cronjobs and a Rest API in NodeJS. My role was the development of new features and maintenance.

ERP, WEB SYSTEM

Company's billing and personnel management system. A legacy system developed with Zend Framework 1 in php 5. My role in this project was the development of new features and maintenance. In addition to developing the billet assembly system and remittances and reading payment returns using the CNAB 240 and CNAB 400 layouts.

INDIKEGANHE, LP, API AND SPA

A new customer referral app. Developed with Laravel 8 and php 7 for the rest API, ReactJS for the front-end of both the panel and the project's CRM. My role in this project was the development of new features and maintenance of the Rest API and other systems linked to the project.

CREDENCIE DIGITAL, WEB E-COMMERCE

An E-commerce of the company's products. It was developed with OpenCart in PHP 7 and Laravel to do the automations. My role in this project was the development of new features and maintenance.
